

In general all commands can be spoken at all times. For example, you don't need to be viewing the Amulet Music screen to select a music artist. Similarly, you don't need to be viewing the Recorded TV screen to select a TV program. You can speak most commands at any time, and they will take effect immediately.

However, while you are learning how to use Amulet, we recommend that you go to the appropriate Amulet screen (music, photos, video, movies, or recorded TV) before you try out commands. The Amulet screens show you when the microphone is active, and also display commands as they are recognized, making it quicker and easier for you to get used to using the speech recognition.
